-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10 and 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen et al. (6,061,261) in view of Yang (6,733,329).

Chen et al. disclose the claimed invention except for the different type of connectors for the universal serial bus voltage transformer. Yang teaches the use of different connectors A-type, B-type and Mine-type for connecting to USB. Chen et al. disclose a wall outlet with direct current output in Figs. 3-18. Fig. 3 is a schematic for the power supply, transformer T1 for converting AC to DC. Fig. 8 shows the main body, which is an integrated power supply and switch for use as a wall outlet. Figs. 12A to 12B show a DC voltage selection technique using different sizes and shapes of connectors and plugs. Fig. 13 shows the generation of a plurality of DC voltages from an integrated power supply. Figs. 17 and 18 show the view of a combined AC/DC outlet. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use any one of the connector type taught by Yang in Chen et al. wall outlet with direct current output in order to connect the applicable data device (personal computer, printer, digital camera, etc) on the basis of its suitability for the intended use as matter of obvious design choice.

***Response to Arguments***

3. Applicant's arguments with respect to claims 1-10 and 14-16 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Adolf Berhane whose telephone number is 571-272-2077. The examiner can normally be reached on Monday- Friday 8 AM to 6 PM.
